USED KIT LIST 49ER

The grading on the condition of the kit is an attempt to define the value and condition of the used equipment in a simple manner.

An items grade is estimated from our experience in terms of what level of racing we would use that equipment in.

G1 stands for Grade one and correspondingly it would be suitable for racing in a grade one event, ie a Hyeres, Keil, Holland or a top event such as national championship in a National class regatta. This grade is new or as good as new.

G2 Still perfect racing condition but might lack the newness of the G1 grade. Most competitors would be more than happy to race with this kit.

G3 We are looking at National events, local open meetings. Excellent condition, no damage just been used a bit more than the G1 and 2's.

G4 Very good quality training. Club racing. Expect to see some small repairs. But no serious issues.

G5 Suitable for boat handling training, knockabout sailing, club racing. Might expect to see some repairs. All repair work would be complete and the equipment would be classed as sound and in god condition.

G6. This is working kit it will get a boat around a course. It may have a shortish life left in it. Will most certainly have seen some repairs and there is likely to be

G7 Damaged but repairable

G8 Written off.
